

**FIRST, FOREMOST
AND FULLY ABOUT
PROJECT LOGISTICS**

**When it comes to project logistics,
there's no such thing as an easy
challenge – or low stakes.**

**Every endeavour is typically
complex and far reaching.**

**And so are many of the skill sets
required to pull it off.**

**But thankfully there is an easy way
to ensure your project is executed
smoothly, seamlessly and cost
effectively.**

**FERRONICKEL REFINERY PROJECT,
BRAZIL**

Moving 7,000 cbm of heavy industrial cargo into the heart of Brazil's mining region required more than transport: it demanded strategy. In 2023, Trans Global Projects combined six vessel charters with river and road solutions to navigate remote terrain, ensuring critical equipment reached the Carajás Mining District safely and on schedule.

TRUST IS OUR GREATEST LOAD

Trans Global Projects (TGP) delivers trusted project logistics across industries—combining global reach, precision, and sustainability to move what matters most.

PROJECT LOGISTICS

- Project logistics management
- Ship chartering
- Project logistics consultancy
- Transport engineering

VALUE ADDED SERVICES

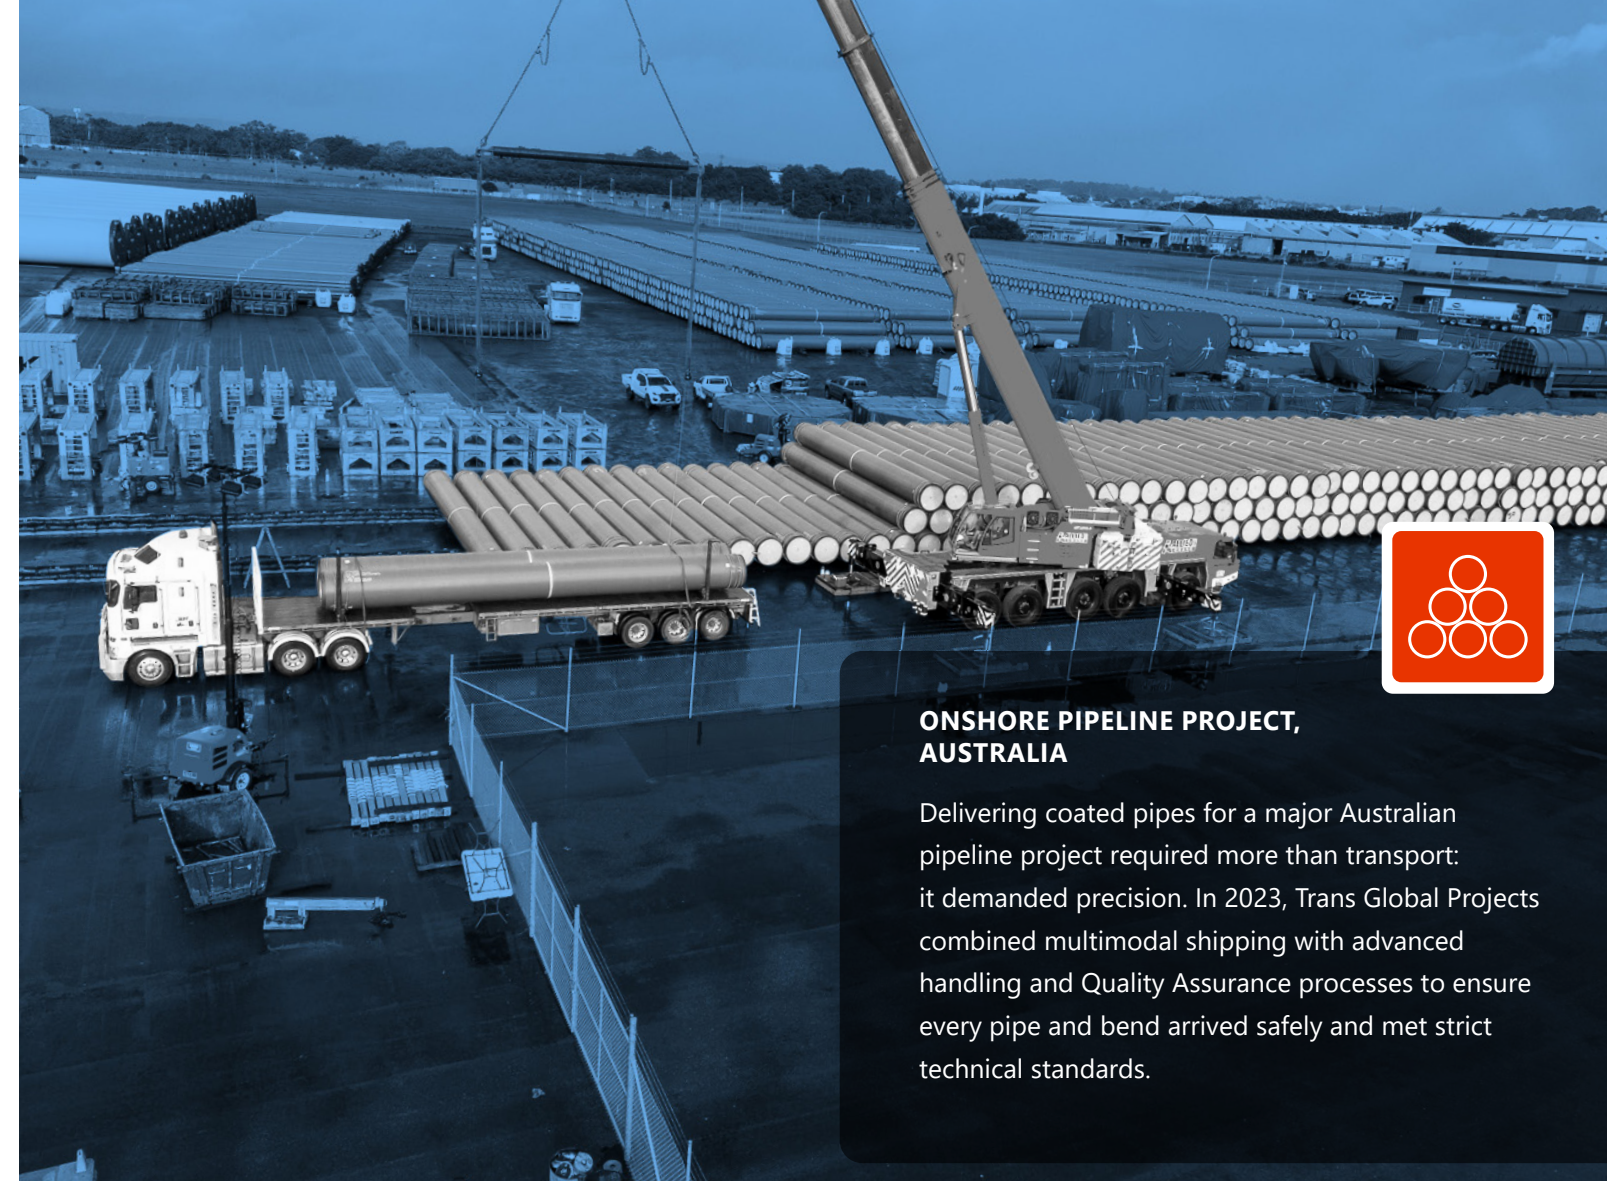

- Sustainability Management
- Transport insurance
- Biosecurity
- Customs brokerage

Complete Project Logistics Focus

TGP is first, foremost and fully about project logistics.

Founded almost 40 years ago, we made a determined decision to focus and grow our extensive network, team and expertise with this core business in mind.

Today we are one of the world's leading specialists in this area, with tons of projects to our credit.

ONSHORE PIPELINE PROJECT, AUSTRALIA

Delivering coated pipes for a major Australian pipeline project required more than transport: it demanded precision. In 2023, Trans Global Projects combined multimodal shipping with advanced handling and Quality Assurance processes to ensure every pipe and bend arrived safely and met strict technical standards.

Broad Project Logistics Capability

We expertly manage project logistics backed by almost 40 years of hands-on experience delivering reliable solutions worldwide.

From remote deserts to bustling cities, Trans Global Projects delivers project logistics wherever your project takes you. Our worldwide network and decades of experience mean we handle even the most challenging locations. We ensure your cargo reaches its destination, no matter how complex or out of the ordinary.

We're committed to earning our clients' trust by delivering consistent, high-quality service and minimising environmental impact. That is why with every project supports a more sustainable and reliable future.

- Project logistics management
- Ship Chartering
- Project logistics consultancy
- Transport engineering

Trans Global Projects offers much more than just moving your cargo. Our value added services help you to improve the efficiency of your operations, saving you time and money.

No matter at which stage of a project's planning phase or if at point of origin or destination, we are there to make it all run smoothly – so you can keep the finger on the pulse of your core business.

- Sustainability Management
- Transport Insurance
- Biosecurity
- Customs Brokerage

As a result, you benefit from world class project logistics services from beginning to end.

HVDC TRANSMISSION PROJECT, USA

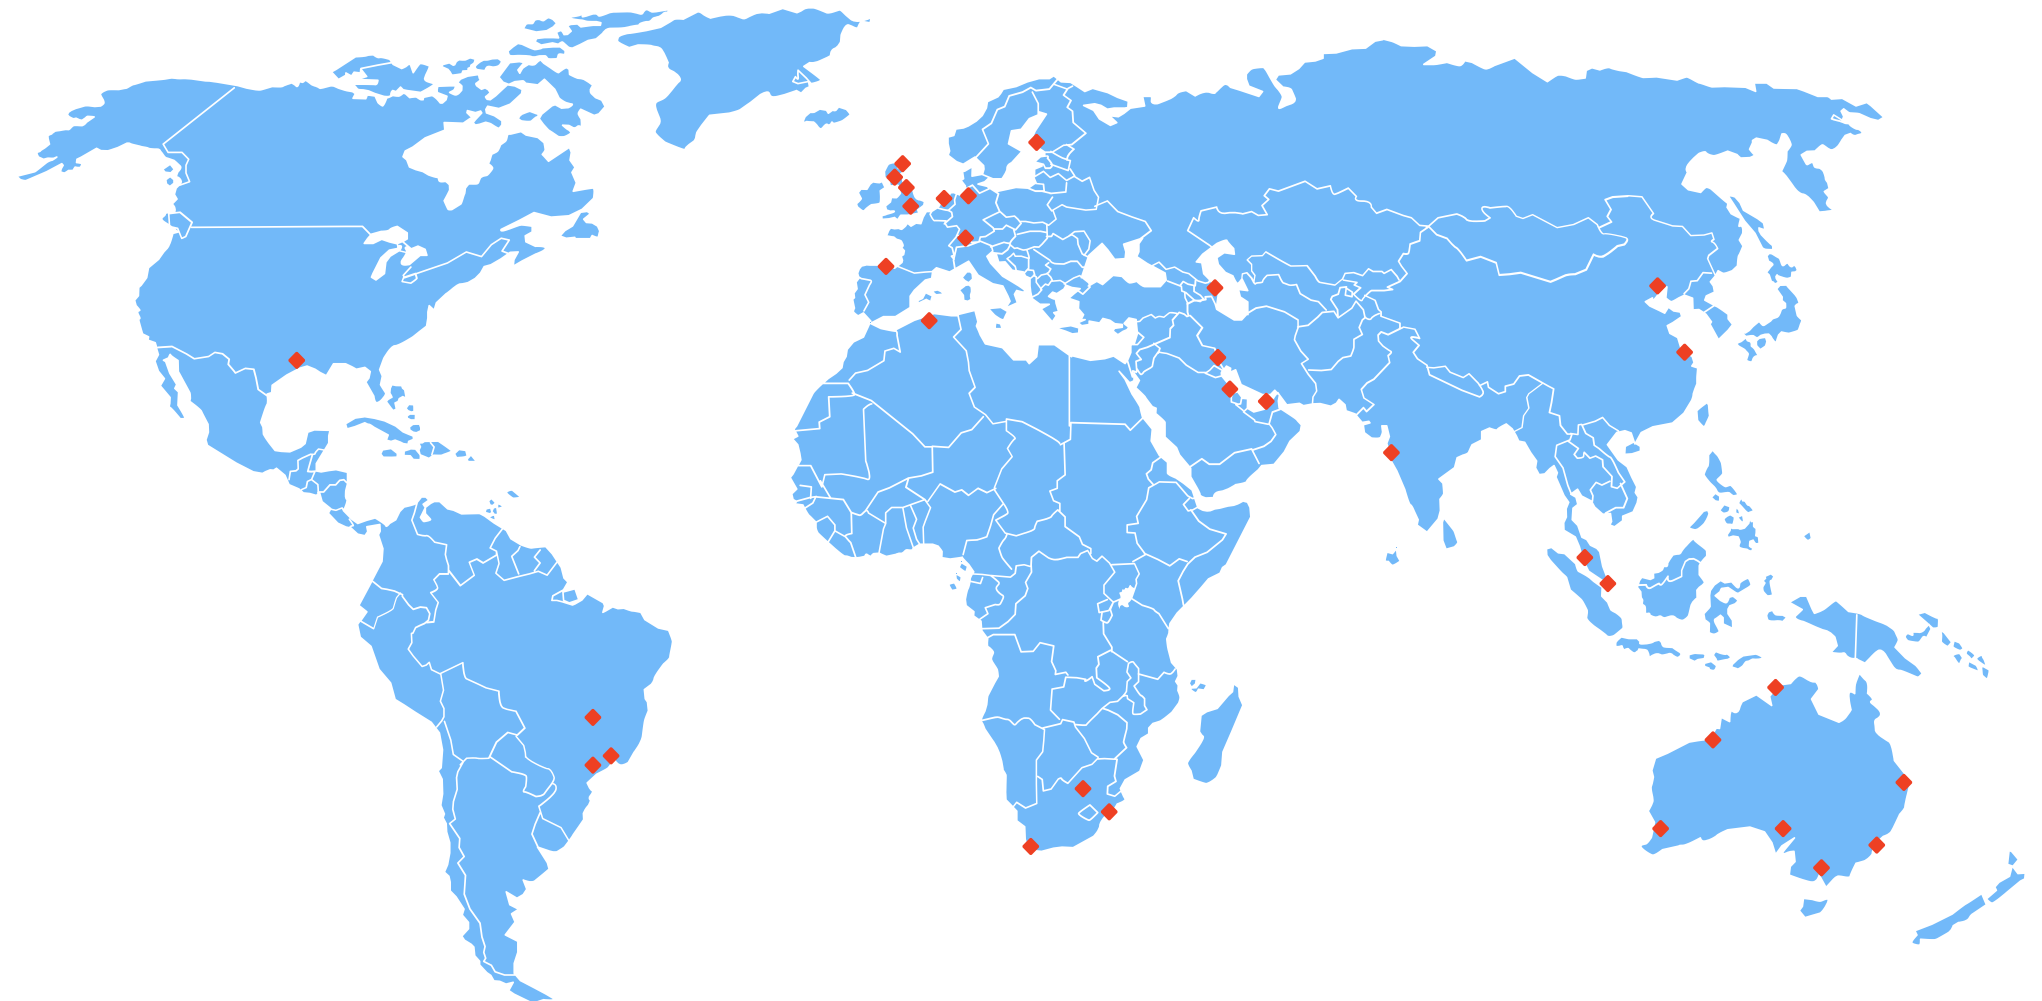

Trans Global Projects managed the transport and installation of High Voltage Direct Current (HVDC) components for a major wind energy project in the southwestern USA, coordinating converters, transformers and general cargo from Europe to Arizona and New Mexico for a 3.5 GW transmission system.

Full Geographic Coverage

Remote locations are often part of the territory when it comes to project logistics, which is why TGP prides itself on having an extensive global network.

With offices across six continents, our global presence and local knowledge puts us in a unique position to offer tailor-made solutions for your project, your business and your industry.

The Benefits of Working with Us

Trans Global Projects delivers end-to-end project logistics solutions across industries and continents. From supply base operations to vessel chartering, we manage complexity with precision.

Experienced

We've handled complex logistics for almost forty years.

Reliable

You can count on us. Always.

Proactive

We plan ahead so you don't have to worry.

We operate with integrity, agility, and ISO-certified excellence—ensuring safety, sustainability, and consistent quality in every move we make.

Resourceful

Smart teams, smart tools. We get things done.

Flexible

We tailor solutions to fit your project—not the other way around.

Global

Wherever your project goes, we're already there.

An Unwavering Commitment to Ethics and Excellence

At TGP, we pride ourselves on being highly adaptable on many levels. Our client list includes many of the world's largest industrial corporations but also numerous small-to-mid-sized companies. We welcome the chance to handle cargo and shipments of any kind, whether it involves 500,000 freight tonnes of assorted project equipment or 500 kg of sensitive air freight. And we're delighted to take on various kinds of projects, regardless of scope or industry.

At the same time, there are a few key things we consider to be non-negotiable – and proudly so. For example:

- We place a strong emphasis on being compliant with all applicable laws in the countries where we and our clients do business – and on having strong systems and processes in place to ensure this happens.
- We've completed certification with TRACE, the world's leading anti-bribery standard-setting organisation.

- We believe in doing everything we can to protect the people who work for and alongside us from harm. We are certified to ISO 45001:2018.

- We have a strong commitment to protecting the planet – and to maintaining our record of preventing spills and minimising environmental impacts. We are certified to ISO 14001:2015.

- And it's of utmost importance for us to provide all our clients, irrespective of size and requirements, a consistent, high-quality level of service. We are certified to ISO 9001:2015.

We prefer to think of this as the right way to do business. So, it all adds up to greater peace of mind for you because when you work with TGP, your project and its components won't just get delivered. They'll get delivered right.

WINDFARM PROJECT, VIETNAM

From 2020 to 2025, Trans Global Projects delivered a full-scale logistics solution for offshore wind developments in Vietnam, handling the transport of 57 turbine sets from multiple Chinese ports and ensuring seamless coordination across loading, ocean freight, customs clearance and final delivery to site.

Project Logistics, Delivered

From delivering 48 lithium BESS units from Qinzhou, China to a remote Australian site via Port Hedland (including dangerous goods compliance, biosecurity steps and a 90 km dirt road final leg) to shipping 4,875 pipe joints from Antwerp, Belgium to Batam, Indonesia for a CCUS LNG project, our case studies show what we do and how we do it: controlled planning, multimodal execution, compliance management and reliable last mile delivery in demanding environments.
